Aim

This course is for cleft surgeons that want to specifically focus on their surgical technique on how to prevent palatal fistulas. World renowned experts will explain their tips and tricks and how to treat fistulas. Different locations often have numerous surgical options. Advantages and disadvantages will be discussed in an interactive manner. For an optimal interactive Master Course, an inventory questionnaire will be obtained from all participants before the meeting. There will interactive videos and lots of time to discuss surgical refinements. This course will include cadaver samples where possible, while surgeons will explain their surgical technique with the help of video footage.
